

# Refining our Routines

---

## Computers:

**Situation:** The laptops are very helpful, but distribution/clean up is taking a lot of class time. I've felt that you're more distracted when they're out and that our rhythm has been off.

**Value:** I want us to use class time well and engage appropriately with each other and with technology.

**Solution:** New Job: Keyholder; Time Goal: Before Class Starts; Now how do we ensure engagement? What ideas do you have?

# Refining Our Routines

---

## Class Discussion

**Situation:** Our discussions are thoughtful and engaging. However, not everyone participates; some over-participate; we don't make great eye contact with each other.

**Value:** Academic discourse is a skill that we can and should develop as we prepare you for college and the workplace. Honoring one another's voices demonstrates respect and builds a collaborative community.

**Solution:** Cue to turn and make eye contact. What do you propose?; What ideas do you have for distributing participation more evenly?
